

BlackBoard Mobile Learn Android Setup

1. To setup BlackBoard Mobile Learn on your Android Device, open Android Market and Search for Blackboard Mobile Learn.

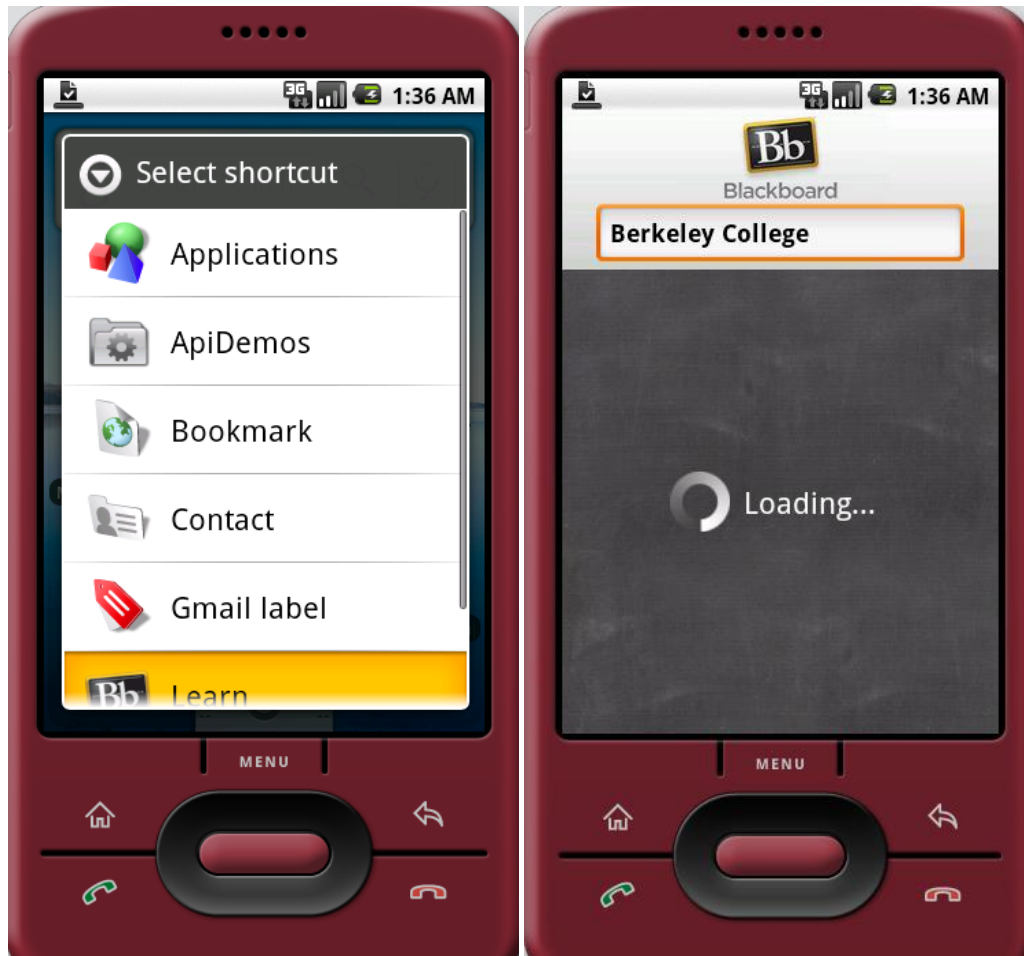

2. Tap on Blackboard Mobile Learn. Next tap on Install.

3. Once installed, return to the home screen and press menu. Afterwards, tap on Add. Select Shortcut from the menu.

- Next, Select Learn from the menu. Once Blackboard Mobile Learn loads, type in Berkeley College in the text bar and press enter.

5. Select Berkeley College from the list.

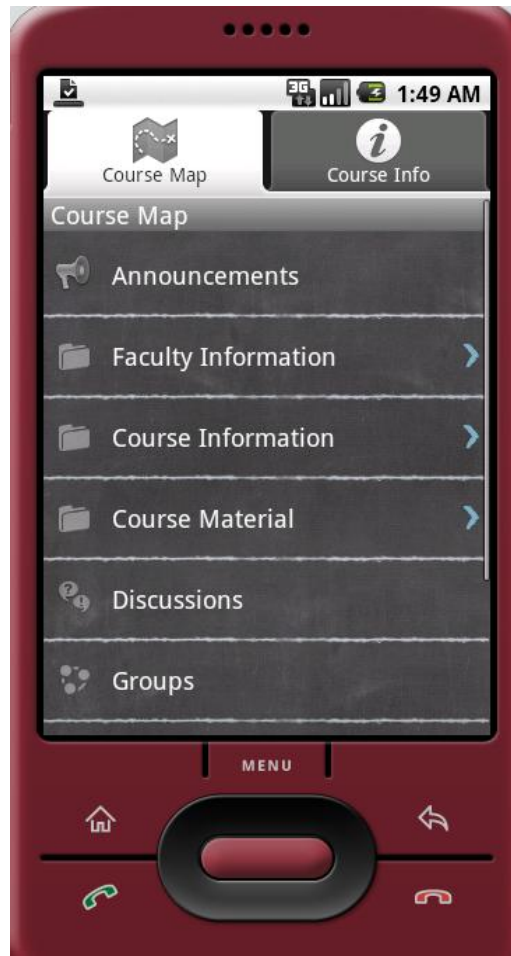

6. Enter in your login information then click login. You may choose to use Remember username and password to help you login the next time you use the program. Please note that after you change your password, you will need to enter in a new password.

7. In the courses tab, you will see a list of the courses you are enrolled in. By tapping on a course, it will add a shortcut to your home menu for easy access.

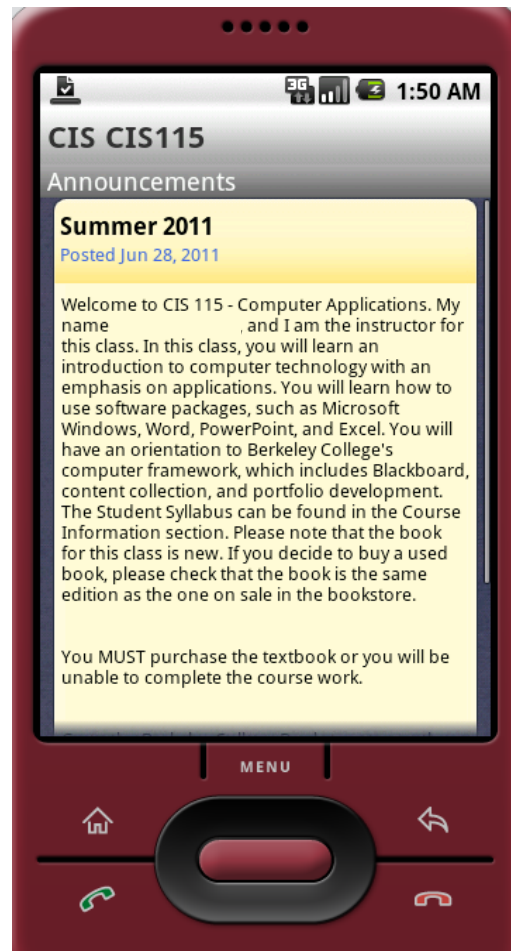

8. In the course screen, you will have access to all the menus of the course you are attending. This menu will always be similar to the menu you will find when you login to Blackboard on a PC.

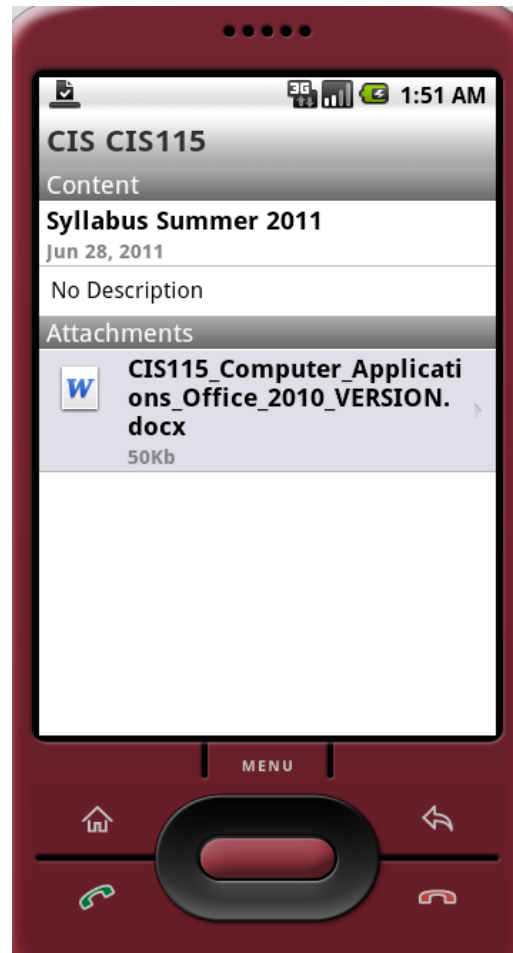

Viewing Announcements

- When viewing announcements, you will be able to view all important information that your instructor has provided.

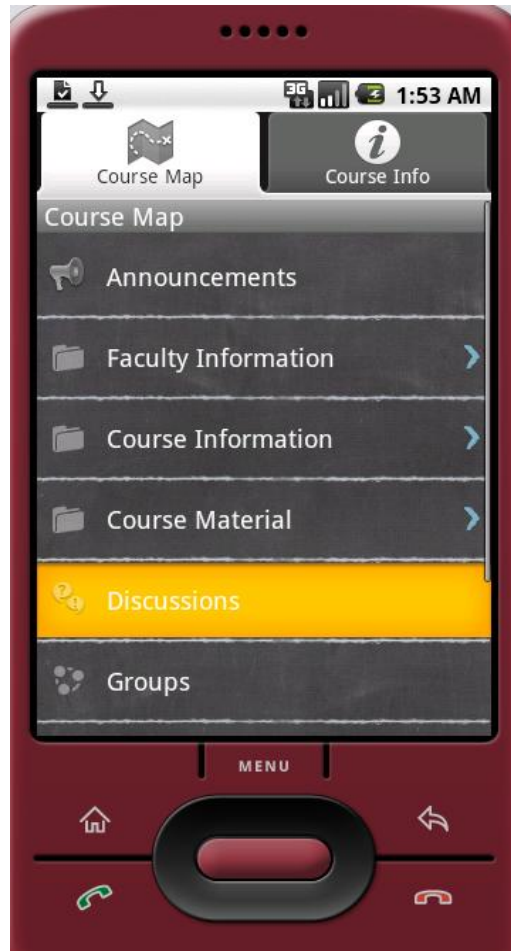

Viewing Documents in Blackboard Mobile Learn

- Please note that in order to view any documents, you will need to use a third party application to view or edit them. Remember that you will not be able to submit assignments via Blackboard Mobile Learn.

Accessing Discussions

- You will be able to access and respond to the discussions available in the course that you are enrolled in.

Viewing Organizations

- Using the Organizations tab, you will be able to view all the organizations available for students. If you click on the Star near an organization, they will be favorited and will be available via the Favorites Tab.
